

**DYNO BATTERY SINCE 1933**

# Battery Boxes 24

*The bitterness of poor quality is long remembered after the fleeting thrill of a cheap price.*

## Battery Storage Boxes

Dyno Battery offers high quality acid resistant polypropylene (black) and polyethylene (white) battery storage boxes for your convenience and most demanding applications.

These heavy walled boxes are seamless for complete containment. Durability and strength are improved by reinforcing ribs. Most boxes are notched both at the top of the box and the lid, for connecting cables.

Group 24 boxes can hold one, two or three standard 24M size batteries. The **24 Double** box is actually a GC2 box. The **24 Triple** box is actually an 8D box.

For mobile applications, nylon web hold down straps are available to secure the box without compromising acid containment.

### Dimensions:

Base (Box only):	Length	Width	Height
24 Single	11 3/16"	7 5/8"	8 1/8"
24 Double (GC2)	15 1/16"	10 15/16"	12 7/8"
24 Triple (8D)	22 1/8"	12 1/4"	11 3/16"
Maximum dimensions (includes Cover):			
24 Single	13 1/2"	9 3/16"	10 5/16"
24 Double (GC2)	15 3/8"	11 5/16"	13 1/8"
24 Triple (8D)	23"	12 7/8"	11 3/8"
