

DYNO BATTERY FOUNDED 1933

Battery Boxes 4H/L16

*The bitterness of poor quality
is long remembered after the
fleeting thrill of a cheap price.*

Battery Storage Boxes

Dyno Battery offers high quality acid resistant polyethylene battery storage boxes for your convenience and most demanding applications.

These heavy walled boxes are seamless for complete containment. Durability and strength are improved by reinforcing ribs. Most boxes are notched both at the top of the box and the lid, for connecting cables. L16/4 is not notched.

Two models are available. L16/2 holds 2 standard **L16 (or D315)** size batteries while L16/4 holds four **L16 (or D315)**.

For mobile applications, nylon web hold down straps are available to secure the box without compromising acid containment.

Dimensions:

Foot print of Base (Box only):

	Length	Width	Height
L16/2	15 1/4"	13"	18 5/8"
L16/4	25 11/16"	15 7/16"	18"

Maximum dimensions (includes Cover):

	Length	Width	Height
L16/2	15 3/4"	13 9/16"	18 15/16"
L16/4	26 5/16"	16 1/4"	18 3/16"
